**THE WCTA VISION FOR A STRONGER WALTON COUNTY**

The Walton County Taxpayers Association (WCTA) has a vision for Walton County as a vibrant, safe place for citizens to live, work, raise families, start businesses, and retire.

The WCTA believes that lower taxes, an efficient county government, elected officials and government agencies that operate with transparency, and an excellent education system are all fundamental to the growth and success of Walton County.

As an advocate for taxpayers and for effective government, WCTA focuses its efforts on achieving the following four goals:

1. A county government that is vigilant about protecting tax dollars – a government that understands and respects the fact that tax dollars are the people’s money, generated through hard work and sacrifice.
2. A county government that operates effectively and efficiently, at all times, with the best interests of citizens at heart.
3. A county government that operates in the Sunshine, with genuine transparency, so that citizens can trust that decisions are made with integrity.
4. A county that values the importance of a high quality, excellent, and affordable education system designed to improve the lives of all of Walton County’s children.
